

LIFTING JACK

HEMS Portable Heavy-Duty Lifting Jack is a compact, portable lifting solution that can vertically bare up to 100tons!

The combination of welded, steel, heavy duty chassis with it's 3-inch ground clearance make it ideal for use in more inhospitable environments. Having only 3 controls (up, hold and down), it is incredibly simple to use while remaining the most effective heavy-duty jack on the market.

HEMS Lifting Jack comes with the standard electrical pump and has the option for pneumatic/ air operated pump. There are also additional accessories to increase stroke capacity, giving it flexibility across many machines/vehicles.

Features / Applications

- Compact & portable, steel alloy construction
- Extension pieces / Bridges provided for additional reach
- Electric / Pneumatic motor - Optional
- Manual / Remote pendant control valve - Optional
- Suitable for lifting & maintenance of heavy earth moving equipment, dumpers, heavy structures & locomotives.

Both standard/compact models available

| Model | Capacity | Stroke | Min height (mm) | Max Extended Height | Total Length |
|--------------------------------|----------|--------|-----------------|---------------------|--------------|
| HE-LJ-60-300/E without remote | 60T | 300mm | 720mm | 1020mm | 1400mm |
| HE-LJ-60-300/E with remote | 60T | 300mm | 720mm | 1020mm | 1400mm |
| HE-LJ-100-300/E with remote | 100T | 300mm | 780mm | 1080mm | 1500mm |
| HE-LJ-100-300/E without remote | 100T | 300mm | 780mm | 1080mm | 1500mm |
| HE-LJ-150-400/E | 150T | 400mm | 650mm | 1050mm | 2100mm |
| HE-LJ-150-700/E | 150T | 700mm | 950mm | 1650mm | 2100mm |
| HE-LJ-200-400/E | 200T | 400mm | 670mm | 1070mm | 2100mm |
| HE-LJ-200-700/E | 200T | 700mm | 970mm | 1670mm | 2100mm |
| HE-LJ-300-400/E | 300T | 400mm | 715mm | 1115mm | 2200mm |
| HE-LJ-300-400/E | 300T | 700mm | 1015mm | 1715mm | 2200mm |
